

SCREENED CHEMISTRY MADE SIMPLE WITH SCIVERA

Simple

Fast

Cost-Effective

THE SCREENED CHEMISTRY PROGRAM

- Brands use Screened Chemistry to objectively understand and compare the human and environmental health characteristics of product and process chemicals used in the supply chain.
- Screened Chemistry Certification requires that you provide information about the chemicals in your product and have an authorized service provider screen those chemicals against specific lists as well as conduct a hazard assessment when needed.
- The service provider then scores the chemical product on a scale from 0-50 based list screen results and hazard assessment results using the Screened Chemistry rules.
- Chemical products with a certified score of 35 and higher receive special recognition on the Screened Chemistry Preferred Chemicals List ("PCL") for supply chain use.

SCIVERA CAN HELP

- Scivera offers the most cost-effective and efficient process for Screened Chemistry assessments and certificates.
- Scivera offers traditional (email) and innovative online, automated methods to securely transmit confidential ingredient information.
- Scivera's Screened Chemistry assessments will also support ZDHC MRSL Conformance. Scivera is an authorized ZDHC MRSL Conformance service provider.
- When you have many chemical products for Screened Chemistry scoring and certification, Scivera offers a very efficient web-based software tool, SciveraLENS Rapid Screen, to simplify the process for you, reduce fees, and make Screened Chemistry even faster and easier for your company.

GET STARTED ON SCREENED CHEMISTRY FOR ONE OR MORE PRODUCTS

1. Gather the chemical data for your product(s). Scivera can assist you in this process and regularly helps clients collect sub-supplier ingredient information while protecting confidential ingredient information.
2. Complete and submit the Screened Chemistry Quote Request Form either via email or through the secure SciveraLENS Rapid Screen platform to receive a quote for services.
3. Upon acceptance, Scivera's team of board-certified toxicologists will complete the required assessment, finalize the Screened Chemistry Score, Report, and Certificate for your product(s), and distribute the information to your Screened Chemistry brand(s).

Our experts will work with you to quickly provide a quote for Screened Chemistry services and help you find the most cost-effective approach for achieving certification.

用 SCIVERA 简化 SCREENED CHEMISTRY

简单

快速

合算

SCREENED CHEMISTRY 项目

- 品牌们用 Screened Chemistry 来客观地理解和比较产品和供应链中使用的工艺化学品的人体和环境健康特征。
- Screened Chemistry 认证要求您提供产品中化学品的相关信息，并让授权服务提供商根据特定清单筛选这些化学品，并在需要时进行危害评估。
- 然后，服务提供商根据清单筛选结果和危害评估结果，使用 Screened Chemistry 规则在 0-50 的范围内对化学产品进行评分。
- 认证后得分为 35 或更高的化学产品在 Screened Chemistry 首选化学品清单 (“PCL”) 上获得特别认可，供供应链使用。

SCIVERA 可以提供帮助

- Scivera 为 Screened Chemistry 评估和证书提供最具成本效益和最有效的流程。
- Scivera 提供传统方式（电子邮件）和创新的在线自动方式安全传输机密成分信息。
- Scivera 的 Screened Chemistry 评估也支持 ZDHC MRSL 符合性。Scivera 是 ZDHC MRSL 符合性认证授权服务提供商。
- 当您有许多化学产品要进行 Screened Chemistry 评分和认证时，Scivera 提供了一个非常有效的基于网络的软件工具：SciveraLENS Rapid Screen，它可以简化您的流程，降低费用，并使您的公司更快速、更轻松地完成 Screened Chemistry 认证。

为您的一个或多个产品开始 SCREENED CHEMISTRY 流程

1. 收集您产品的化学数据。Scivera 可以在此过程中为您提供帮助，并定期帮助客户收集次级供应商成分信息，同时保护机密成分信息。
2. 通过电子邮件或安全的 SciveraLENS Rapid Screen 平台填写并提交 Screened Chemistry 报价申请表，以获得服务报价。
3. 接收后，Scivera 资格认证的毒理学家团队将完成所需的评估，最终确定您的产品的 Screened Chemistry 分数、报告和证书，并将信息分发给您的 Screened Chemistry 品牌。

我们的专家将与您合作，快速提供 Screened Chemistry 服务的报价，并帮助您找到最具成本效益的方法来获得认证。
