

Thank you for your interest in the Screened Chemistry process with Scivera.

We are happy to provide certifications for one product or many depending on your needs and can provide quotes to help you make your decision.

To proceed with a quote, please contact screenedchemistry@scivera.com. You may also choose to complete the form below and submit it to screenedchemistry@scivera.com. Scivera's team will review your submission and provide a quote based on the information provided.

To proceed with your request for assessment, scoring, and certification, please complete the form below and submit it to screenedchemistry@scivera.com or visit [our website](#) to submit this form through our secure web portal and further protect your confidential business information.

Information required for Screened Chemistry Certification:

1. **Basic Information about your product or products** (e.g. Product Name, Company Name, etc.)
2. **Confidential Full Formulation Disclosure data for your product**
 - 100% formulation disclosure (CAS numbers and concentrations)
 - Include sub-supplier formulations (CAS numbers and concentrations)
 - Scivera can support you in gathering this information
 - Identify if chemicals are intentional ingredients or impurities (e.g., residuals, byproducts, etc)
 - Screened Chemistry requires that you disclose:
 - all intentionally-added chemicals (no threshold)
 - all impurities (eg residuals, impurities, etc) present in final formulation at or greater than 100 ppm (0.01%)
 - any chemicals present on the ZDHC MRSL including those with concentration < 100 ppm (0.01%)
 - If any polymers are present in the formulation, please complete and attach the [Scivera Polymer Assessment Data Collection Form](#) to share with Scivera
3. **Supporting documentation:**
 - Safety Data Sheet (SDS) for this product
 - Technical Data Sheet (TDS) for this product
 - Polymer Assessment Data Collection Form (if applicable)
 - Safety Data Sheet (SDS) for any sub-supplier mixtures or chemicals in this product (if applicable)
4. **Signed Ingredient and Documentation Disclosure confirmation**

You must confirm that you have met all disclosure requirements prior to Scivera proceeding with your certification request. Please see page 4 to confirm your compliance with each requirement.

SCREENED CHEMISTRY SUBMISSION FORM
Application for Assessment, Scoring, and Certification

Please complete all fields before submitting to Scivera for review and next steps.

1. Basic Information:

Date:

Company Name:

Product Name:

Please indicate certification program of interest (check all that apply):

<input checked="" type="checkbox"/>	Screened Chemistry
<input checked="" type="checkbox"/>	ZDHC MRSL Conformance*

**As part of the Screened Chemistry services with Scivera, we will also evaluate your product for ZDHC MRSL (Level 1) Conformance. If your product meets the requirements for ZDHC MRSL Conformance, we will include a certificate for you to upload to the ZDHC Product Gateway.*

2. Confidential Full Formulation Disclosure*:

CASRN	Designation (Ingredient or Impurity)	Type** (Polymer or Other - incl. sourced material)	Concentration (%)

**Please include all intentional ingredients at any concentration, any impurities present at concentrations greater than or equal to 100 ppm (0.01%), and any chemicals present on the ZDHC MRSL including those with concentration < 100 ppm (0.01%).*

***Please include the [Polymer Assessment Data Collection Form](#) for each polymer in this product and the Safety Data Sheet (SDS) for each sub-supplier mixture or chemical in this product.*

3. Supporting Documentation:

Please include the following when you submit this request:

- Required:
 - Safety Data Sheet (SDS) for this product
 - Technical Data Sheet (TDS) for this product
- If applicable:
 - Polymer Assessment Data Collection Form
 - Safety Data Sheet (SDS) for any sub-supplier mixtures or chemicals in this product

Ingredient and Documentation Disclosure Confirmation:

Please place a checkmark or initial next to each item in the list below to confirm that you have met the disclosure requirements for Screened Chemistry.

____ **I confirm that this Confidential Full Formulation Disclosure includes:**

- all intentionally-added chemicals (no threshold)
- all known residuals and impurities present at or greater than 100 ppm (0.01%)
- any chemicals present on the ZDHC MRSL including those with a concentration less than 100 ppm (0.01%)
- and I have identified any polymers and sub-supplier mixtures or chemicals if applicable

____ **I have attached all required documentation:**

- Safety Data Sheet (SDS) for this product
- Technical Data Sheet (TDS) for this product
- (If applicable) Polymer Assessment Data Collection Form for each polymer in this product
- (If applicable) Safety Data Sheet (SDS) for any sub-supplier mixtures or chemicals in this product

By signing here, you are confirming that the above disclosure is accurate, complete and meets all required items listed above.
