---

## QUICK GUIDE

With more than a decade of experience, Scivera has become the premiere partner for helping companies and their entire supply chain manage their chemicals in a safer and more sustainable manner. As part of the Enhesa company, Scivera is now taking sustainable chemistry to new heights.

Our cloud-based platform, SciveraLENS<sup>®</sup>, puts sustainable chemicals management at your fingertips, engaging your entire supply chain to help you make informed chemicals decisions and create safer products.

Safer chemicals >> Safer products >> Safer world.

## ENSURE BRAND INTEGRITY with a proactive process

- **Screen formulations** for sourcing and product development to help teams design safely from the start.
- Leverage the **largest catalog of verified CHAs available—more than 4,500**—to get ahead of impending regulations like the EU Green Deal.
- Utilize our **23-toxicological endpoint system** to proactively identify potential issues and find safer alternatives.
- Understand your company's **chemical footprint**.

## INNOVATE SMARTER with an easy-to-use interface

- Manage **compliance and certification requirements** with automatic list-checking.
- Simplify **data-gathering, list-screening, and chemical hazard assessments**.
- Access **supplemental research** to gain deeper understanding.
- **Save money** by reducing the amount of time you have to spend, leveraging Scivera's team of board-certified toxicologists.

## UNITE YOUR SUPPLY CHAIN with multiple points of contact

- **Submit or request chemical reports** that protect supplier IP while providing necessary chemical safety information.
- **Streamline the data-gathering process** with the request feature that allows suppliers to upload information.
- Keep suppliers in the loop with **automatic change notifications** to formulations and Restricted Substances Lists (RSLs).
- **Create your own lists**, or build off of existing ones, to create an understanding of what sustainable chemistry means to your company.
